

# Inspection & Testing

Special Locations

# Introduction

- The majority of BS7671 relates to typical installations. However, there are some locations within an installation that require special consideration. This is due to the consideration that such areas may present the user with an increased shock risk.
- BS7671:2008 has increased the number of special locations to 15.

# Categories of Special Location

- Bathrooms, shower rooms etc
- Swimming Pools
- Rooms and cabins containing saunas
- Construction sites
- Ag/hort locations
